

BSK-Elements Recap / Intro

Bluesky Elements is our own in-house component library built using :

- custom html elements
- template tags
- and Petite Vue

What problems does it solve?

- Build speed
- Benefits of a component Model

Where we're up to

- Round 1 of bsk-els build work in BP
- Testing on Wessex, use on builds
- Current new round of bsk-els build work
- Feedback from build devs has been key in tasks

Problems solved / focus areas in this round

- Large time-to-build components
- Proper integration with BP
- A clean BP - folder structure etc
- BS Sass Variables Issues and Design Transfer
- Amends - inc COGCMS issues
- Bundle size / load speed and core web vital with new entry points

New components

- Header
- Footer
- Spots
- Grids with slick
- Shortlist summary
- Shortlist compare
- Off concept hero x 3

BP bsk-els integration

- Homepage
- Examples dir and GH Actions
- Offers list
- Cards
- Hero
- Contact us

Demo time!

Feedback

- Any feedback?
- Backlog for ideas
